

Learning Strategy

Learning Strategies are the thoughts and actions that help make learning easier or more effective.

The learning strategy for this lesson is *Analyze Information*. When we are learning a second language, we can think carefully about the new information we learn, and make a decision. That is what *analyzing information* means.

In the video, Dr. Bennett asks Anna many questions. Then she analyzes the information she learned. She tells Anna to stay home, drink water and sleep.

Can you find another time in the video when someone analyzes information? Write to tell us about it [in an email](#) or in the Comments section. Teachers, see the Lesson Plan for more on how to teach this strategy.
