

Learning Strategy

Learning Strategies are the thoughts and actions that help make learning easier or more effective.

The learning strategy for this lesson is *Visualize*. *Visualize* means creating an image in your mind. When learning a new language, we can *visualize* to help us understand what we are learning.

In this week's video, Anna *visualizes* playing a baseball game. You can also say she imagines playing the game. Jonathan listens and makes an image in his own mind. He understands that Anna loves baseball. He says, "You really love baseball. Have fun at the game, Anna."

Do you ever *visualize* when listening to or reading English? Write to us about it in the Comments section or [send us an email](#). Teachers, see the [Lesson Plan](#) for more details on teaching this strategy.
