

## Learning Strategy

Learning Strategies are the thoughts and actions that help make learning easier or more effective.

The learning strategy for this lesson is *Cooperate*. When we work together to meet a goal we are *cooperating*.

In this lesson, Anna and Marsha are planning a dinner party. They cooperate to share the work. Anna says, "In fact, tonight Marsha and I are cooking for friends. Well, she is cooking. I am doing the shopping."

We can also cooperate by practicing English language skills with a friend or classmate. How do you use this cooperating strategy in your study of English? Write to us about it in the Comments section or [send us an email](#). Teachers, see the [Lesson Plan](#) for more details on teaching this strategy.
