

Learning Strategy

Learning Strategies are the thoughts and actions that help make learning easier or more effective.

The learning strategy for this lesson is *Focus Attention*. This strategy is what we use when we want to finish a job and make sure we do all of the things we want to do.

In this lesson, Jean is a tourist in Washington, D.C. Anna tells Jean about the interesting museums in the city. Jean makes a list so she can remember to visit all of the interesting museums. When Jean makes at her list, then looks at it later, she is *focusing attention* on what she wants to do. As she sees each museum, she can check each museum off on the list.

What do you do to focus your attention on the things you are learning in English? Write to us about it in the [Comments section](#) or [send us an email](#). Teachers, see the [Lesson Plan](#) for more details on teaching this strategy.
