

Learning Strategy

Learning Strategies are the thoughts and actions that help make learning easier or more effective.

The learning strategy for this lesson is *Evaluate*. We use this strategy when we **look back** at how we have learned and **look forward** to how we can learn more. In learning a language, we can *evaluate* how well we are learning and also *evaluate* how we are using strategies to learn. When we think about which strategies helped us, we know that we should use those strategies again.

In this lesson, Anna **looks back** at how she took chances in learning to do her job and to live in a big city. She is also **looking forward** to her new career as an actor. She is taking a chance to go to Hollywood and be in the movies.
