

To make a mini-booklet

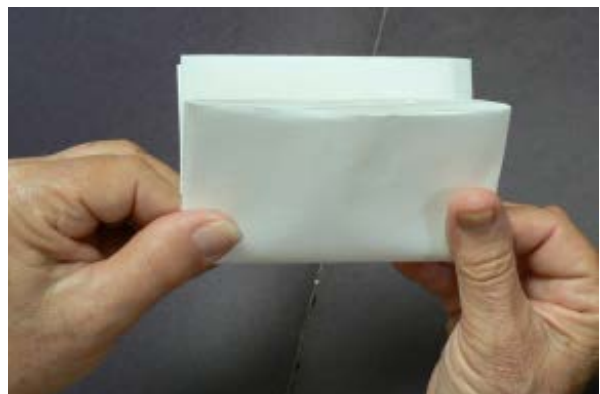

1. Fold a sheet of paper in half, bringing the longer sides together.

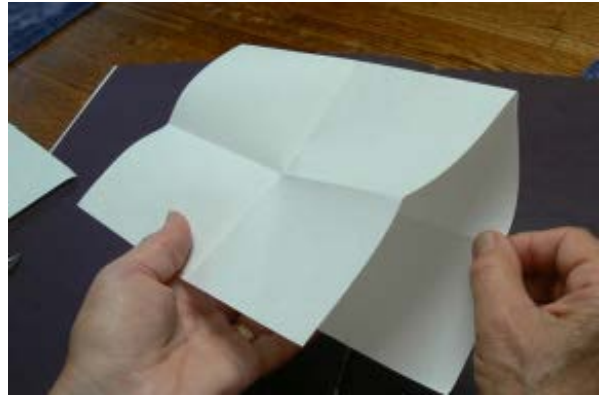

2. Fold again..

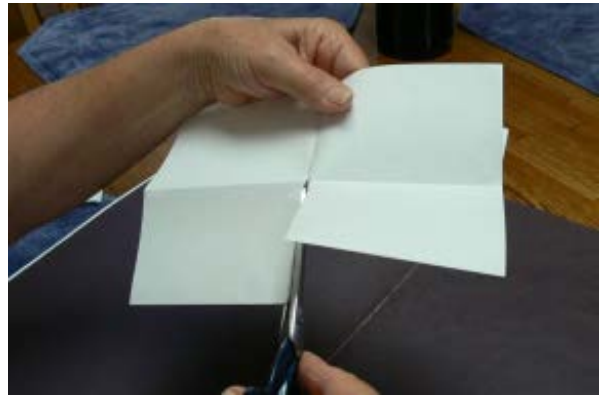

3. Fold one more time.

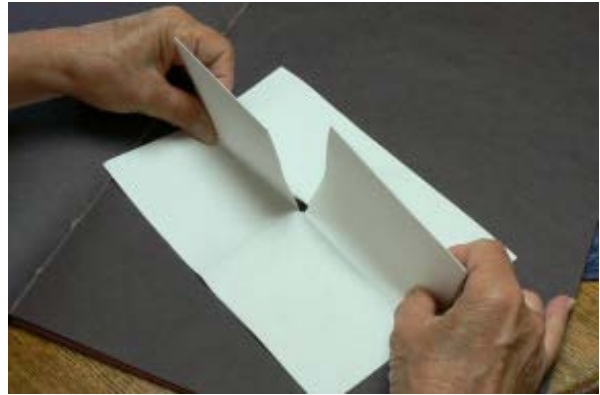

4. Open and hold by the two ends.

5. Starting from the middle fold, cut to the next fold, where two fold lines intersect. Do not cut past the intersection.

6. Set on a flat surface with the fold up and the two ends spread out from the center.

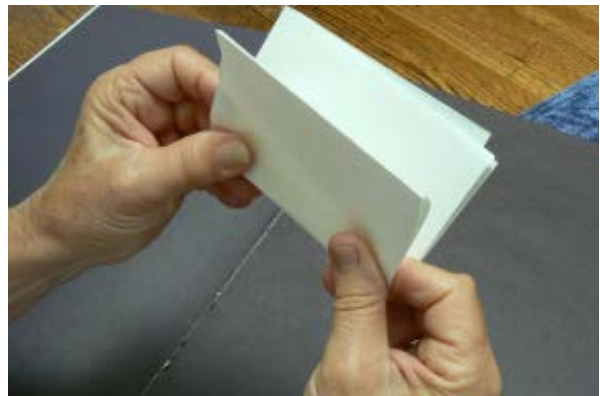

7. Lifting the paper, press the left and right edges together. From the top, your sheet now resembles a letter 'X'.

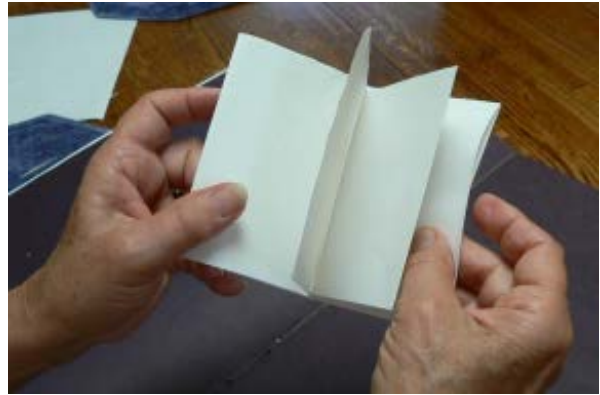

8. Press the folded edges to a firm crease.

9. Press the arms of the 'X' together.

10. Now you have a mini-book with a front cover, a back cover and six interior pages.
